SHIFT-MRI V4: Dataset Integrity & Split Audit Report

Dataset Integrity and Split Verification Summary

Total Scans Indexed: 848 across 3 independent cohorts

Audit Status: PASS (Zero cross-split leakage, zero NaNs, all 128^3 verified)

Cohort Breakdowns

- **OASIS-1 Primary Cohort:** N=198 (138 Train, 30 Validation, 30 Locked Test). Cross-split participant leakage: 0.0%. Scanner: 1.5T Siemens Vision.

- **ADNI Zero-Shot Transfer Cohort:** N=500 (303 Cognitively Normal, 197 Alzheimer's Disease). Scanners: Siemens N=370 (74.0%), Philips N=130 (26.0%), GE N=0.

- **OASIS-2 Exploratory Cohort:** N=150 (85 Non-Demented, 65 Demented). Reported strictly as exploratory due to potential cross-study participant overlap with OASIS-1.

Quality Assurance & Harmonization

- All volumes standardized to 128x128x128 voxel grids with voxel intensity z-score normalization.

- Zero corrupt arrays, zero missing files, zero non-finite values detected.
